CLEAR Plus Security Lanes

Our signature CLEAR Plus Security Lanes enable access to predictable and fast identity verification through dedicated entry Lanes at airport security checkpoints for our members.

Seamless Travel

We are constantly innovating to give travelers the best experience possible. Our Home To Gate feature in the free CLEAR mobile app, our partnership with TSA PreCheck, and the Reserve powered by CLEAR reservation tool are just a few ways we've worked to improve member experiences.

Health Pass

CLEAR's Health Pass and digital vaccine card are helping businesses "Come Back Better" by making it easy for people to show their proof of vaccination.

Sports Lanes

The CLEAR Sports Lanes and frictionless concessions make it easier for fans to get to their seats or grab a beer at stadiums and arenas.

Privacy Done Right

CLEAR's Commitment To Your Privacy

CLEAR is committed to privacy done right, and that means keeping you in control of your personal information. Transparency and security are at the center of everything we do, because our mission is to make experiences easier AND more secure.

- **CLEAR Will Never Sell Your Data:** You are you, and your personal information is yours. It is our policy to never sell your data and always has been.
- **CLEAR Will Always Be Opt-In:** You should never have to use a technology solution you are not comfortable with.
- **You Control Your Biometric Information:** You provide the images and biometrics we use and CLEAR only uses them for the services you signed up for. You will always know when you are interacting with our services. We never collect images or biometrics without permission.
- **You Have A Right To Transparency:** CLEAR will always be transparent. You will know when CLEAR is asking for your information, what information we are asking for, and how it will be used.
- **You Can Always Delete Your Data:** You have full control of your information. When you no longer want to use our services, all of your data – including biometrics – will be deleted upon request.
- **Privacy Done Right Also Means Keeping Your Data Secure:** CLEAR's comprehensive security program meets the highest standards for data protection and privacy. CLEAR will always act responsibly to protect your data, and keep it secure.

Meeting the Highest Security Standards

- CLEAR's biometric enrollment and verification platform has been SAFETY Act Certified as a Qualified Anti-Terrorism Technology by the Department of Homeland Security.
- CLEAR's security program is rated NIST High, and was implemented in accordance with the National Institute of Standards and Technology's (NIST) security control framework.
- CLEAR is compliant with the Payment Card Industry Data Security Standard, an information security standard for organizations that handle credit card information.
- CLEAR is also SOC 2 certified, receiving independent attestation that our platforms, including our infrastructure and processes, have the strong controls in place to meet many of our partners' trust and security requirements.

Responsible Use of Biometrics

Keeping Members in Control

We understand that biometrics such as facial recognition, iris scans, and fingerprints are especially sensitive data, which is why it is our firm belief that technology solutions powered by biometrics are best utilized by private-sector companies on an opt-in basis. Empowering individuals to choose whether or not to utilize biometric technologies is the best way to build trust with individuals and communities, and to ensure these solutions are developed in a responsible, equitable, and reliable way. Every solution powered by CLEAR is fully opt-in, and designed to maintain the trust that we have built with our members and users.

- Unlike many of the facial recognition applications that have recently received notoriety, all of CLEAR's solutions rely on user-provided images and biometrics. CLEAR is confirming that you are you based on your opt-in enrollment information, unlike other facial recognition applications that search for your face among a database of images.
- We do not conduct surveillance or scanning of crowds. We are comparing a user-provided photo against a government-issued ID that the users themselves have chosen to provide us, and we are empowering members to use their biometrics to confirm their identity.
